

Release Notes Version 3.8.7

RepcO Invoice Retrieval

Some users have reported when receiving Repco invoices digitally that they are receiving the same invoice multiple times. This issue has been addressed and no more attempts will be made to import duplicate invoices.

Tax Tables 2024/25

The tax tables in Version 3.8.7 are compliant with the changes for 2024/25 financial year, **simply select the calculator** on the payroll transaction form and the new deductible value will be inserted.

Employer Superannuation Guarantee

2024/25 sees the introduction of a new contribution rate for employer super guarantee payments of 11.5% version 3.8.7 will edit the value on the payroll transaction form to the current rate.

Income tax	PAYG Withholding			\$193.00

RepcO Vehicle Details

When purchasing through Navigator we have for a while now inserted automatically the vehicle information Repco has access into the vehicle form. This has up until now been a background operation, V3.8.7 allows the user to select whether they wish to be prompted to import the data or retain the current record.

This option is controlled from **File / Site Settings / Online > Navigator > Prompt For Vehicle Updates**.

Navigator	Vehicle Data Comparison
<input checked="" type="checkbox"/> Enable Navigator Integration Site code: 75421450001 Username: Repco#1 Password: ***** <input type="checkbox"/> Import service text <input type="checkbox"/> Use quote price for new parts <input checked="" type="checkbox"/> Prompt for vehicle updates	<p>The vehicle SURE20 has the following data: Make: HOLDEN Model: COLORADO Series: RG (12-20) Engine type: 2.8L Duramax LWN DOHC 16v Turbo Diesel Direct Inj.</p> <p>Navigator has returned the following data: Make: HOLDEN Model: COLORADO Series: U148MK Engine type: 2.8L LWN DOHC 16v Turbo Diesel Direct Inj. 4cyl 147kW</p> <p>Do you wish to update this vehicle with the new data?</p> <p><input type="button" value="No"/> <input checked="" type="button" value="Yes"/></p>

Users who want to control the import simply select the option so they can view the current and Repco entries then choose to accept or decline by selecting the Yes or No controls at the bottom of the message form.

Note: If the Repco data matches what is already recorded Automation does not display the option to overwrite.

Code Optimisation

Over the past 3 months or so we have optimised the source code to eradicate a few operational issues. The code is now aligned with the latest releases of Microsoft Windows to ensure fast remote access and a trouble-free operating environment. To assist in this regard, we have tweaked our cloud server code and significantly upgraded the hardware specifications.
